

Game changing data and analytics for medical device manufacturers, distributors and providers.

TRACK MEDICAL DEVICE KITS WITH UNPRECEDENTED INSIGHT.

IMPROVE BOTTOM-LINE PERFORMANCE WITH A NEW LEVEL OF VISIBILITY, UTILIZATION AND CONTROL OF YOUR MEDICAL DEVICE INVENTORY ACROSS THE SUPPLY CHAIN.

Quest by QMed is both a hardware and software solution. It creates smart kits with its advanced, proprietary IoT solution. It works with virtually any IT infrastructure, and is easy to integrate or manage as a stand-alone system. And since it's automatic, it eliminates manual input and human error. This groundbreaking solution allows you to capture information that previously wasn't possible. With this new level of insight, you can significantly reduce operating costs and increase case coverage.

TRANSFORM THE WAY YOU DO BUSINESS.

With Quest, you'll learn information about your orthopedic kits that's never been available before. This heightened capability stands to revolutionize the way you track and manage your inventory.

- User interface feed data and analytics that are meaningful to specific users, whether you're an inventory analyst, customer service representative, compliance officer or sales distributor/representative.
- Completely hands-off, Quest takes the guesswork out of locating and managing sets to eliminate waste in your supply chain.
- You'll see real time asset performance, improved reallocation of inventory, and significantly reduced capital expenditures, allowing you to make more informed decisions.

To learn more about how you can track your medical device kits with incredible accuracy, reach us at: info@qmedinnovations.com or 401.619.6898

Quest

“

All companies in this space are faced with the same challenge. They can't track their kits deployed in the field.

— ORTHOPEDIC SERVICE PROVIDER

Quest delivers:

- Real time location
- Historical data of inventory turns
- Record of hospitals where kits are utilized
- Ease of regulatory compliance and recall management
- Maintenance and calibration tracking
- Proactive management of instrument life cycle
- Self-auditing capability
